ULTRASOUND REPORT

One Organ Ultrasound

Reference is made with previous KUBP ultrasound since October 3, 2018

The urinary bladder is physiologically distended with urine. There is no evidence of stones nor mass lesion. The wall is not thickened.

Pre-void urine volume: 134 cc Post-void volume: 6 cc

There is regression in size of the prostate gland measuring 3.8 x 3.4 x 4.4 cm with approximate weight of 29.7 gm (previously 36 gm). The parenchymal echopattern is inhomogenous. No discrete mass noted. The anatomic capsule is intact. Concretions are again seen within.

IMPRESSION

Interval regression in size of the prostate gland presently grade I with concretions

Normal sonogram of the urinary bladder.
