

**SECTION OF PERIPHERAL VASCULAR DISEASES
DEEP VENOUS THROMBOSIS SCREENING**

Name: DIOMANGAY, UBALDO D.
Address: CALBAYOG CITY SAMAR
Date: March 01, 2019

Age/Sex: 56 / M
Study No: DVT 19-03-002/IE33-2/JANE
Referring MD:

RIGHT LEG

	B-Mode Image	Color Flow
DEIV	Compressible	Full
CFV	Compressible	Full
SFJ/GSV	Compressible	Full
DFV	Compressible	Full
SFV P	Compressible	Full
SFV M	Compressible	Full
SFV D	Compressible	Full
POP	Compressible	Full
POP D	Compressible	Full
SPJ/SSV	Compressible	Full
PTV D	Compressible	+
PERONEAL	Compressible	+

LEFT LEG

	B-Mode Image	Color Flow
DEIV	Compressible	Full
CFV	Compressible	Full
SFJ/GSV	Compressible	Full
DFV	Compressible	Full
SFV P	Compressible	Full
SFV M	Compressible	Full
SFV D	Compressible	Full
POP	Compressible	Full
POP D	Compressible	Full
SPJ/SSV	Compressible	Full
PTV D	Compressible	+
PERONEAL	Compressible	+

REMARKS

1. Incidental finding of enlarged bilateral inguinal lymph nodes
2. Pulsatile venous waveform pattern noted on the bilateral proximal venous segments suggestive of elevated central venous pressure secondary to right-sided heart failure and/or pulmonary hypertension and/or venous hypertension
3. Rheologic stasis noted along the bilateral venous segments of both lower extremities
4. The bilateral Posterior Tibial Arteries and Dorsalis Pedis Arteries have triphasic waveform pattern

INTERPRETATION

No evidence of acute Lower Extremity Deep Venous Thrombosis, bilaterally
