Sex: 38/F
Ref. MD:

Date: March 07, 2019
Case: 19-2184

RADIOLOGIC REPORT

X-Ray Lumbosacral Spine

No definite fracture or spondylolisthesis seen in the views obtained.

There is preservation of the normal lumbar lordosis.

The line of weight bearing falls within the sacral promontory.

Vertebral bodies, disc spaces, pedicles, process and soft tissue outlines are unremarkable.

IMPRESSION:

Unremarkable lumbar spine x-ray.

May do CT scan/MRI correlation if clinically indicated.
