Ref. MD:

Date: March 01, 2019  
Case: 19-2005

## **RADIOLOGIC REPORT**

### **X-Ray Chest PA View**

Follow-up chest study since 10/13/2018 shows relative stability of right upper lobe residual fibrosis considering difference in technique.

Rest of the lungs show no recent active parenchymal infiltrates.

Same heart size and configuration.

There is same degree of mild thoracic dextroscoliosis.

No other significant chest interval findings.
