ULTRASOUND REPORT

Pelvic Ultrasound

The urinary bladder is physiologically distended with urine. There is no evidence of stones nor mass lesion. The wall is not thickened.

Pre-void urine volume: 260 cc Post-void volume: 16 cc

The uterus is normal in size measuring 7.4 x 3.0 x 4.6 cm. The myometrial echopattern is homogenous. There is no mass or calcification seen. The endometrial stripe is thin measuring 3 mm. The ovaries are not visualized. There is no definite adnexal mass seen. No abnormal fluid collection noted within the cul de sac.

IMPRESSION

Normal sonogram of the urinary bladder, uterus and adnexae.
